EXPERIENCE

Software Development Intern

Wasel Alkhair · Jeddah, Saudi Arabia · 2024 (2 months)

- Designed and built 20+ pages for the company website and managed its content and on-page SEO.
- Created the brand identity and logo used across the website.
- Fixed or built ~5 bugs and features in C++, C# and Java projects with the development team, testing and debugging each change before release.

Competitive Programmer

Codeforces Specialist (rating 1430) with 256 problems solved across Codeforces and LeetCode; strong data structures and algorithms.

PROJECTS

Flex - Gamified Fitness Platform (Graduation Project · 92/100, A+)

React 18 · TypeScript · Capacitor · Node.js/Express · Firebase

- Built the React and TypeScript frontend, including 4 role-based dashboards (user, trainer, gym owner, admin), and shipped it to web and Android.
- Designed XP, levels, badges and daily streaks across 18 events to keep users coming back; met all 20 core requirements with sub-300ms average API responses.
- Deployed live and validated with 5 student testers through 20+ end-to-end workout journeys.

Coffee Chain Website - Live Concept Redesign

React 19 · Vite · React Router · Framer Motion · Leaflet

- Replaced a static site (branches as plain text, menu as a photo) with a searchable branch map and a readable, priced menu.
- Built a design-token system (~100 CSS tokens) powering light and dark themes, with language and theme state in React Context.
- Full Arabic RTL through logical CSS, prerendered pages for SEO, and accessibility built in: skip link, focus-visible, ARIA tabs and reduced motion.

Cloud ERP - SaaS for Saudi SMBs

React · Mantine · TanStack Query · i18next · Fastify · PostgreSQL

Building the bilingual web app with TanStack Query for server state and i18next for live Arabic/English (RTL/LTR) switching, on a TypeScript API with tenant isolation through PostgreSQL Row-Level Security.

Kafu - Workout Accountability App

React Native · Expo Router · Reanimated · Supabase

Building a mobile app where friends set weekly goals and check in together, with animated UI, file-based navigation and server-side moderation; in testing with 5 early users.

mohamadd.me - Portfolio

Hand-built with HTML, CSS and JavaScript: theme tokens with light/dark modes, an English/Arabic RTL switch, keyboard-accessible project pages and reduced-motion support.

PROFILE

Frontend developer and Software Engineering graduate who builds accessible, bilingual React and TypeScript interfaces in English and Arabic, LTR and RTL, backed by full-stack experience and a strong algorithmic foundation. Saudi Premium Residency holder, so I can join with no sponsorship or transfer.

TECHNICAL SKILLS

FRONTEND

REACT | TYPESCRIPT | JAVASCRIPT | HTML / CSS | REACT NATIVE | MANTINE | TANSTACK QUERY | FRAMER MOTION | i18n / RTL | ACCESSIBILITY | VITE | DESIGN TOKENS

BACKEND & TOOLS

NODE.JS | EXPRESS | FIREBASE | SUPABASE | POSTGRESQL | GIT
