EXPERIENCE

Software Development Intern

Wasel Alkhair · Jeddah, Saudi Arabia · 2024

Built and maintained features across C++, C# and Java projects while contributing to the company website's design, content, SEO and brand identity. Worked with the development team to troubleshoot issues and improve functionality, and tested and debugged code to ship reliable releases.

Competitive Programmer

Codeforces Specialist (rating 1430) with 256 problems solved across Codeforces and LeetCode; strong knowledge of data structures and algorithms; active in coding contests.

PROJECTS

Flex - Gamified Fitness Platform (Graduation Project)

Built a full-stack social fitness platform (React, TypeScript, Node.js/Express, Firebase) with workout sharing, PR logging and AI-generated weekly programs. Designed an XP engine across 18 events, 4 role-based dashboards and OTP email sign-in; delivered all 20 core requirements with sub-300ms average API responses, deployed on Vercel and Render.

Madda - AI Assistant for Saudi Labor Law

Building an English and Arabic assistant that answers labor-law questions with cited, word-for-word article quotes, using hybrid retrieval (BM25 + embeddings) in Python/FastAPI and the Claude API, with an evaluation set to measure accuracy.

Cloud ERP - Multi-Tenant SaaS for SMBs

Building a bilingual ERP in TypeScript (Fastify, PostgreSQL, React) starting from the accounting core, with tenant isolation through PostgreSQL Row-Level Security, role-based permissions and a full audit log.

Kafu - Workout Accountability App

Building a React Native (Expo) mobile app on Supabase where friends set weekly goals, check in and keep each other consistent, with server-side moderation through Edge Functions.

Hospital Management System (Team Lead)

Led a university team in building a hospital management system from the ground up, applying object-oriented design for modular, maintainable code.

PROFILE

Software Engineering graduate who builds full-stack products end to end, from architecture to deployment, with a strong algorithmic foundation (Codeforces Specialist, 256 problems solved).

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

C++ | C# | JAVA | TYPESCRIPT | JAVASCRIPT | PYTHON

Tools & Technologies

REACT | NODE.JS | EXPRESS | FIREBASE | .NET | POSTGRESQL | GIT

EDUCATION

Uskudar University | 2022-2026

Software Engineering

Scrimba — HTML, CSS, JavaScript & React (4 courses)

LANGUAGES

Arabic (Native)

English (Professional Working Proficiency)

Turkish (Intermediate)
